Hello!

We are delighted to inform you that you have been selected to participate as an independent contributor for the **Software Engineering AI Trainer – “Project Nectarine”**. We are excited to welcome you to the team.

To ensure clarity regarding the nature of this engagement, please note the following **essential** points:

- **Role Type:** This is a **1099 independent contractor** role. We are **unable** to accommodate C2C (Corp-to-Corp), W2, or Employer W2 arrangements.
- **Compensation:** You will be paid on a per-deliverable basis. Once you join our Slack channel, the Strategic Project Lead will share details on how compensation is structured for each task. Individual deliverables may include multiple components, such as attempts and reviews, which will be covered during onboarding. Compensation varies per deliverable depending on the complexity and length of each task. All payment amounts are estimates based on expected time to complete the work, and overall, you can expect to earn approximately \$100 USD per hour on average. For each project you complete, payment will be processed once the deliverable has been formally accepted by the SPL (Strategic Project Lead) and you have submitted an invoice in Greenlight.
- **Project Duration:** 8 weeks
- **Time Commitment:** 20 hours per week minimum, but you are welcome to work as much as you can contribute over the project duration. The project does not guarantee a full 8 weeks, but it also could be pushed past the initial 8 weeks.

Your Next Steps

Your immediate next step is to register and set up your profile with our payment and compliance partner, **Greenlight.ai**. Registering and setting up your profile will act as you **understanding and meeting the essential requirements** above to join the project!

You will receive the Greenlight invitation email within the next 24-36 hours!

1. **Register with Greenlight.ai:** You will receive a separate email invitation shortly from Greenlight.ai. Please follow the instructions to register.
2. **Compliance:** As part of the registration process, you will be required to undergo a standard background check and set up your payment information. Completing this step is mandatory before commencing work.

Once your Greenlight.ai registration and compliance checks are complete, you will be invited to a dedicated Slack channel after your onboarding is completed and cleared in the system. The SPL will be your primary point of contact there and will guide you through the final project-specific onboarding steps.

We look forward to working with you on Project Nectarine.

Cole Manning

Program Manager, Growth

Data Annotation & AI Team
